

LIVERY STABLES.

SINCE my LIVERY STABLES were destroyed by fire in August last, I have erected on the same lot on Second st., and have now in use, another large, comfortable, and convenient lot of Stables, fully equal, if not superior to any in this State.

For the liberal patronage heretofore bestowed upon me by my friends and the public, I return my most grateful thanks, and hope by diligent and proper attention to my business, to insure a continuation of the same.

I have also a large dry and comfortable lot, with good sheds, and comfortable stalls, for the accommodation of drivers. All of which, are situated in the most public part of the town, and convenient for trade or business of any kind.

Save your Corn Cobs and Shucks.
TO THE PLANTERS AND MILLERS OF NORTH CAROLINA.

THE undersigned has obtained Letters Patent, to enable common Mill stones (or rocks) now in use, to grind CORN, COB and SHUCK, into meal, for Horses, Mules, Cattle, Hogs, &c., thereby saving more than one third of a crop, which is an important item with planters. The machinery used for the above purpose is simple and durable, and cannot, with fair means, get out of order. It will last as long as the Stones last, with an expense of 50 cents every five years. To enable the common Mill Stone, to grind ear corn into meal, requires no new buildings or extra power. It can also be applied to Horse Mills, Threshing Machines, Gins, or any given power known. The same Mill will grind one-third more of Corn Meal by the introduction of this Machinery, and can be changed from grinding Corn and Cob, to grinding Corn Meal in the space of thirty seconds. Corn alone, when fed to stock, is said to be by the most practical and scientific Planters, constituting in its effects, producing founders, cholera and various other maladies which are incident to stock. Grinding cobs with the Corn, makes a food congenial with their nature, and cannot produce any of the serious results above mentioned. Stock, when fed on Corn exclusively, are deprived of the benefits of digestion (so necessary to the proper health of animals), by their being unable to eat a sufficient bulk to produce digestion before the animal becomes gorged. Cobs ground with the corn, produce the necessary distention, without any danger of diseases arising from overeating. Corn and cob meal is improved by scalding, and still more by boiling, and yet more by a partial fermentation. All the preparations facilitate digestion for Hogs. But Horses and Mules will not eat fermented food, consequently they will require it dry or partially wet with cold water. Horses, Mules and Oxen, when fed with unground food, void much in an undigested state, which is of course lost for all beneficial purposes. Read the subjoined certificate.

The undersigned can be addressed at Raleigh, and all calls will be attended to punctually and with despatch by himself or Agent.

W. F. COLLINS.
March 14, 1845. 26-1y

CERTIFICATE.
Having been solicited by Maj. Collins to have my Mill adjusted to grind Corn in the Ear and Shuck, I consented that he should do so as an experiment; and I am able to say that it grinds Corn in the Shuck at the rate of 30 bushels per hour; and the dressing of the stones is so improved, that it grinds shelled Corn more than twice as fast as before, and by my watch, at the rate of 15 bushels per hour, and the meal finer than usual. I deem it a valuable improvement, and shall purchase the right to use it, as it will afford me a speedy way of feeding my horses and cattle, and save much thereby.
